"Do Your Research!"

Re-search. Searching what is already there. A simple sentence can be a structure in hundreds of ways. Likewise, a person can grasp the same piece of information in many different ways. It is paramount to know your facts before concluding. How hard is it to go into the depth of the matter? Look for similar ideas published on authentic sites, explore related books, go out meet people who work in the same field, analyze differences, make your complacent notes, find relations, and lastly, ponder on the conclusion.

Don't be an Anderson when you can be Sherlock. Always do your research.

Play Video Games!

Well, if this doesn't put a smile on your face, then you are probably not a fan of video games. Mostly used as a stress-buster or a break in the routine, playing virtual or manual games comes with numerous cognitive benefits. A few of them include increased problem-solving ability, enhanced audio-visual reception, multitasking, mental stimulation, improved concentration, and rational thinking.

Believe it or not, reading (& replying) to fellow mate's texts while sub-consciously killing enemies on the forefront heightens your brain speed, thus, helping you handle other life decisions. So, next time you find yourself in a dilemma, hop on to the chair and play Counterstrike or Mario!

Conclusion

Above is not an exhaustive list of stuff you can do to elevate your thinking process. While creativity comes naturally to some people, it is not wrong to look for options elsewhere. Inculcating out-of-the-box thinking is not only helpful in getting a decent job but also in inspiring life-changing decisions.
